

# ECO-Series™

## Pond & Waterfall Products

EasyPro is pleased to introduce the Eco-Series product line. All Eco-Series products are roto-molded for strength, durability and are made in the U.S.A.

**Made in the USA!**

**Skimmers** — All skimmers install inside the liner! No bolts, no silicone and no cutting the liner!

**Waterfall Filters** — Liner attaches to the filters using patented “Spliner Lock” bars

**Fountain Basins** — Available in four sizes, each has four bays allowing for multiple options

**Waterfall Spillways** — One piece spillways in 18", 23", 34" and 48", uses “Spliner Lock” bars

## Fountain Basins

The perfect choice for creating one of the hottest trends in the landscape industry right now - bubbling fountains. These fountains are ideal for homeowners with limited space.

- Four sizes to choose from
- 40" and larger have four access doors allowing multiple pumps, autofills or planting pockets
- Great project piece for the do-it-yourselfer

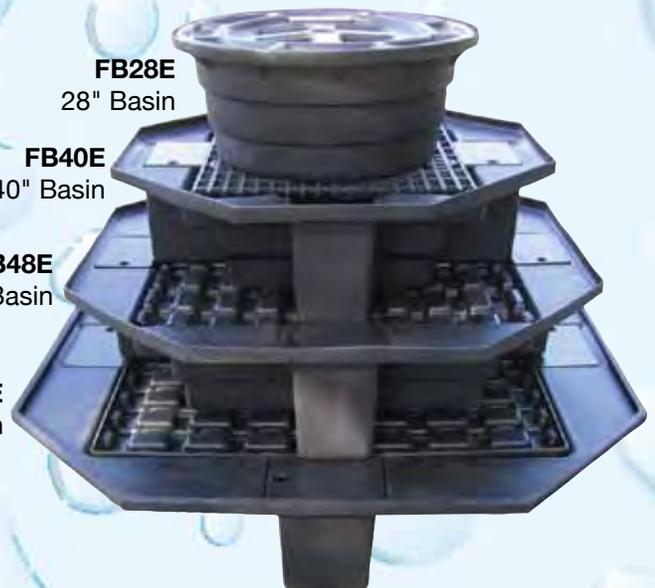

**FB28E**  
28" Basin

**FB40E**  
40" Basin

**FB48E**  
48" Basin

**FB58E**  
58" Basin

All Eco-Series products are made in the USA!

# ECO-Series™ Skimmers

Available in three sizes – 30 gpm, 80 gpm and 135 gpm

All sizes come with molded debris baskets and lids

## Prelude Skimmer

- Ideal for mag drive pumps up to 30 gpm (1800 gph)
- 4" opening
- Part # **PS4E**

## Melody Skimmer

- Fits pumps up to 80 gpm (4800 gph)
- 6" opening
- Part # **PS6E**

## Ovation Skimmer

- Holds larger pumps up to 135 gpm (8000 gph)
- 10" opening
- Skimmer part # **PS10E**
- Optional moulded color lid available, part # **PS10ML**

*All skimmers install inside the liner, ribbed design allows dirt to hold skimmer in place when backfilled. Installation is easy – no cutting liner, no silicone, no bolts!*

# ECO-Series™ Pump Vaults

A low cost way to ensure easy access to the pump in your pondless water feature. Makes inspection and maintenance an easy task.

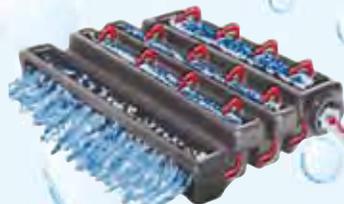

- Rated for pumps up to 100 gpm (6000 gph)
- Measures 17" in diameter at base, 14" in diameter at top and 24" tall
- Lid can be made of flagstone or waterfall rock
- Part # **PV60E**

# ECO-Series™ Waterfall Diffuser

Patent Pending

Great product for building waterfalls in block walls around pools! Also ideal for use as starting point for streams in pondless waterfall applications.

- 23" wide with dual 2" inlets
- Multiple diffusers can create large waterfalls
- Flow capacity from 25 gpm to 100 gpm
- Part # **UWD23**

# ECO-Series™ Waterfall Filters

Complete with filter media and inlet fittings installed.

## Prelude Filter

- 13" waterfall opening
- Filters ponds up to 1000 gallons
- Maximum flow rate 30 gpm
- 1¼" inlet
- Part # **WF10E**
- Lid Part # **WF10L**

## Sonata Filter

- 18" waterfall opening
- Filters ponds up to 1800 gallons
- Maximum flow rate 50 gpm
- 1½" inlet
- Part # **WF18E**
- Lid Part # **WF18L**

## Melody Filter

- 17" waterfall opening
- Filters ponds up to 3000 gallons
- Maximum flow rate 70 gpm
- 2" inlet
- Part # **WF29E**
- Lid Part # **WF29L**

## Symphony Filter

- 34" waterfall opening
- Filters ponds up to 6000 gallons
- Maximum flow rate 150 gpm
- Dual 2" inlets
- Part # **WF60E**
- Lid not available

*Optional lids make concealment easy.*

*Liner attachment uses "Spliner Lock" system — no silicone, no bolts!*

# ECO-Series™ Waterfall Spillways

- One piece design
- Easy liner attachment — no bolts, no silicone
- Dual 2" inlets in each spillway, pre-installed

Each spillway comes with a 4" diffuser pipe which lays on the bottom of the spillway. Water enters either end and spreads out across the width of the spillway thru the diffuser pipe. The inside of the spillway can be filled with stone or gravel creating a very natural looking waterfall.

CF34E 34" Spillway

CF23E 23" Spillway

CF18E 18" Spillway

CF48E 48" Spillway

# ECO-Series™ Tempo Skimmer & Filter

**This small skimmer is designed to remove floating debris from ponds up to 80 square feet, including pre-formed ponds.**

Skimmer hangs inside pond with two straps, making it ideal for use in concrete pools and preformed ponds. It can also be installed inside the liner of conventional ponds. Pump mounts to outside wall of skimmer on either side or bottom. Rated for pumps up to 1800 GPH. Comes complete with filter pad, debris basket, fittings and two hanging straps.

Part # **PS3E**

**This submersible pond filter provides mechanical and biological filtration in ponds up to 600 gallons.**

Ideal for mag drive pumps up to 850 GPH. Pump sits under filter pads preventing plugging. Designed for use with  $\frac{3}{4}$ " or 1" tubing. Comes complete with dual media — white inner roll provides biological surface area while black surface media traps debris.

Part # **WF6E**

# ECO-Series™ Vortex Solids Filter

Patent Pending

**This solids filter will greatly reduce cleaning of any waterfall fill box.**

Install inline prior to waterfall filter — circular water motion forces solids to bottom of filter, cleaner water exits through top. Aerates water as it leaves the filter which enhances biofilter activity.

- Measures 29" wide at the top, 23" wide at the bottom and is 36" tall

Part # **VSF45**
